# Nifty100 Financial Analytics Platform
## Analyst Guide
```

```
---
```

``` # 1. Introduction ```

The Nifty100 Financial Analytics Platform is an end-to-end financial analytics solution for analyzing Nifty 100 companies. It provides financial statements, KPIs, valuation metrics, peer benchmarking, sector analysis, clustering, and REST APIs through an interactive Streamlit dashboard.

```
---
```

``` # 2. System Requirements ```

- ```
- Python 3.11+
```
- ```
- SQLite
```
- ```
- Streamlit
```
- ```
- FastAPI
```
- ```
- Required Python packages installed from `requirements.txt`
```

```

```

## ``` # 3. Running the Project ```

```
Start FastAPI
```

```
```bash
uvicorn src.api.main:app --reload --port 8000
```
```

API documentation:

```
```
http://127.0.0.1:8000/docs
```
```

```
Start Streamlit
```

```
```bash
streamlit run app.py
```
```

Dashboard:

```
```
http://localhost:8501
```
```

```

```

## ``` # 4. Dashboard Overview ```

The dashboard consists of multiple modules:

- ```
- Home
```

- Company Profile
- Financial Screener
- Sector Analysis
- Peer Comparison
- Capital Allocation
- Valuation
- Annual Reports

5. Company Profile

Displays:

- Company Information
- Financial Ratios
- Revenue Trend
- Profit Trend
- Balance Sheet
- Cash Flow
- KPIs

6. Financial Screener

Users can filter companies using:

- ROE
- Debt to Equity
- Operating Margin
- Sector
- Market Cap Category
- Revenue Growth

7. Sector Analysis

Provides:

- Sector Median KPIs
- Company Distribution
- Bubble Charts
- Industry Comparisons

8. Peer Analysis

Compare companies within the same peer group using:

- ROE
- ROCE
- Profit Margin
- Revenue Growth
- Percentile Rankings

9. API Usage

Available endpoints include:

- /health
- /companies
- /companies/{ticker}
- /companies/{ticker}/ratios
- /companies/{ticker}/pl
- /companies/{ticker}/bs
- /companies/{ticker}/cashflow
- /companies/{ticker}/documents
- /market-cap/{ticker}
- /sectors
- /peers
- /portfolio/stats

10. Troubleshooting

Common issues:

- Database path incorrect
- Missing dependencies
- Port already in use
- Invalid company ticker
- Empty database tables

11. Conclusion

The platform enables efficient financial analysis, company screening, valuation, peer comparison, and investment research through a unified dashboard and REST API.
